HERO EQUIPMENT (YANGZHOU) CO., LTD

CONTENTS

01

About Us

Specializing in heavy steel waste bins for over 20 years, a guarantee of strength and reputation.

04

Other Custom Bin

Professional solutions for special scenarios.

02

Product Introduction

From 2m³ to 8m³, meeting various general waste disposal needs.

05

Key Advantages

Why choose our products?

03

Product Specs

Understand our product's core configuration and technical standards.

06

Applications & Service

Wide range of applications and comprehensive customer service.

01 / About Us

Hero Equipment (Yangzhou) Co., Ltd.

We are a manufacturer specializing in heavy steel skip bins, hook lift bins, roll off dumpsters, front load bins, and self-tipping bins with over 20 years of industry experience.

High Standard Certification

Products comply with Australian/European construction site standards, ensuring safety and compliance.

Customization Service

OEM customization, logo spray painting, and multi-color coating are supported to meet your personalized needs.

Quality Assurance

Each product undergoes strict load-bearing tests before leaving the factory, with a 1-year warranty.

Scale Production Capacity

With a monthly production capacity of up to 1000 units, we can efficiently meet bulk export orders.

"Specializing in casting quality, pursuing excellence together" - Committed to becoming your most reliable global partner.

02

Heavy Duty Open Top Skip Bin

Standard Open Top Range • 2m³ - 8m³ | The most efficient waste disposal solution for all scenarios.

03 / Product Specifications

Material

Mild Steel, in China we usually use Q235, which is similar to grade 250 in Australia, we can also use Q345 which is similar to grade 350 in Australia

Plate Thickness

3mm M/S plate for sides and 4mm M/S for floor. Thicker plates are available based on your requirements.

Frame Reinforcement

100×50×4 square tube fully welded, forged integrated lifting lugs for unyielding load capacity.

Surface treatment

Sandblasting + Two times Epoxy primer + Two Times Polyurethane topcoat for superior rust and impact resistance.

Optional Accessories

Doors, lifting eyes, rainproof lid, casters, bottom Channels, reflective warning strips, locking device, etc.

Standard Range

Mini 2m³ Small Waste Bin

Compact for narrow spaces, easy to maneuver. One person can load with a wheelbarrow, high turnover efficiency.

 **Dimensions**
1800×1500×900mm

 **Plates**
Side 3mm,
Floor 4mm

 **Weight**
~260 kg

Application: Small home renovations, garden landscaping, shop clearances, factory metal offcuts.

Advantage: Small footprint, fits in narrow passages, operable by one person with a wheelbarrow.

3m³ Household/Small Construction Bin

The preferred size for rental industry, balances capacity and flexibility for most small renovation projects.

 **Dimensions**
2400×1500×930mm

 **Plates**
Side 3mm,
Floor 4mm

 **Weight**
~350 kg

Application: Bathroom demolition, small garden renovations, store fit-outs, small-scale construction waste.

Advantage: The universal best-seller, the preferred size for the rental industry.

Standard Range

4m³ Medium Multi-Function Bin

Dimensions: 3200 × 1500 × 930mm

Plates: Side 3mm, Floor 4mm

Weight: ~520kg

Application: Partial home renovations, full shop refits, small demolition projects.

Advantage: Optional rear door for wheelbarrow access, convenient for pouring concrete and sand.

6m³ Construction Mainstream Heavy-Duty Bin (Hot selling)

Dimensions:
3500 × 1500 × 1220mm

Plates: Side 3mm, Floor 4mm

Weight: ~645kg

Application: Full home renovations, roof removal, civil construction sites, large amounts of brick and concrete.

Advantage: Balanced capacity, considering both load volume and site placement, reinforced base suitable for heavy construction waste.

Standard Range

7m³ Large skip waste Bin

Dimensions: According to drawing

Plates: Side 3mm, Floor 5mm, edn 3mm, Base end 4mm, back wall 4mm.

Weight: ~860kg

Application: Home renovation, construction waste, landscaping projects.

Advantage: Compact design, easy transport, suitable for daily waste collection.

9m³ Heavy-Duty gantry lift skipBin

Dimensions: According to drawing

Plates: Side 3mm, Floor 4mm

Weight: ~645kg

Application: Building projects, demolition works, commercial waste disposal.

Advantage: Larger capacity, fewer collections, improved waste handling efficiency.

Standard Range

15 m³ Large Hook lift Bin

Dimensions
5400×2010×
1400

Plates
Customized

Weight
~2200 kg

Application

Designed for construction waste, industrial scrap, municipal waste collection, recycling centres and large commercial projects.

Advantage

Compatible with standard hook lift trucks for fast loading and unloading. Heavy-duty steel body provides excellent strength, durability and long service life.

Standard Range

20 m³ Large Engineering Bin

Dimensions
5500×2010×
1800

Plates
Customized

Weight
~3900 kg

Application

Suitable for large construction sites, demolition projects, industrial waste transfer, manufacturing facilities and recycling operations.

Advantage

High-volume design maximises waste transportation efficiency. Reinforced frame and wear-resistant steel construction handle heavy loads and frequent operation.

Standard Range

25 m³ Large Engineering Bin

Dimensions
5400×2010×
2250

Plates
Customized

Weight
~4500 kg

Application

Perfect for large-scale demolition, infrastructure projects, industrial waste handling, scrap metal collection and waste transfer stations.

Advantage

Extra-large capacity reduces transport frequency and operating costs. Designed for heavy-duty applications with strong lifting points and reinforced structure.

Standard Range

30 m³ Large Engineering Bin

Dimensions
6600 × 2010 ×
2225

Plates
Customized

Weight
~5000 kg

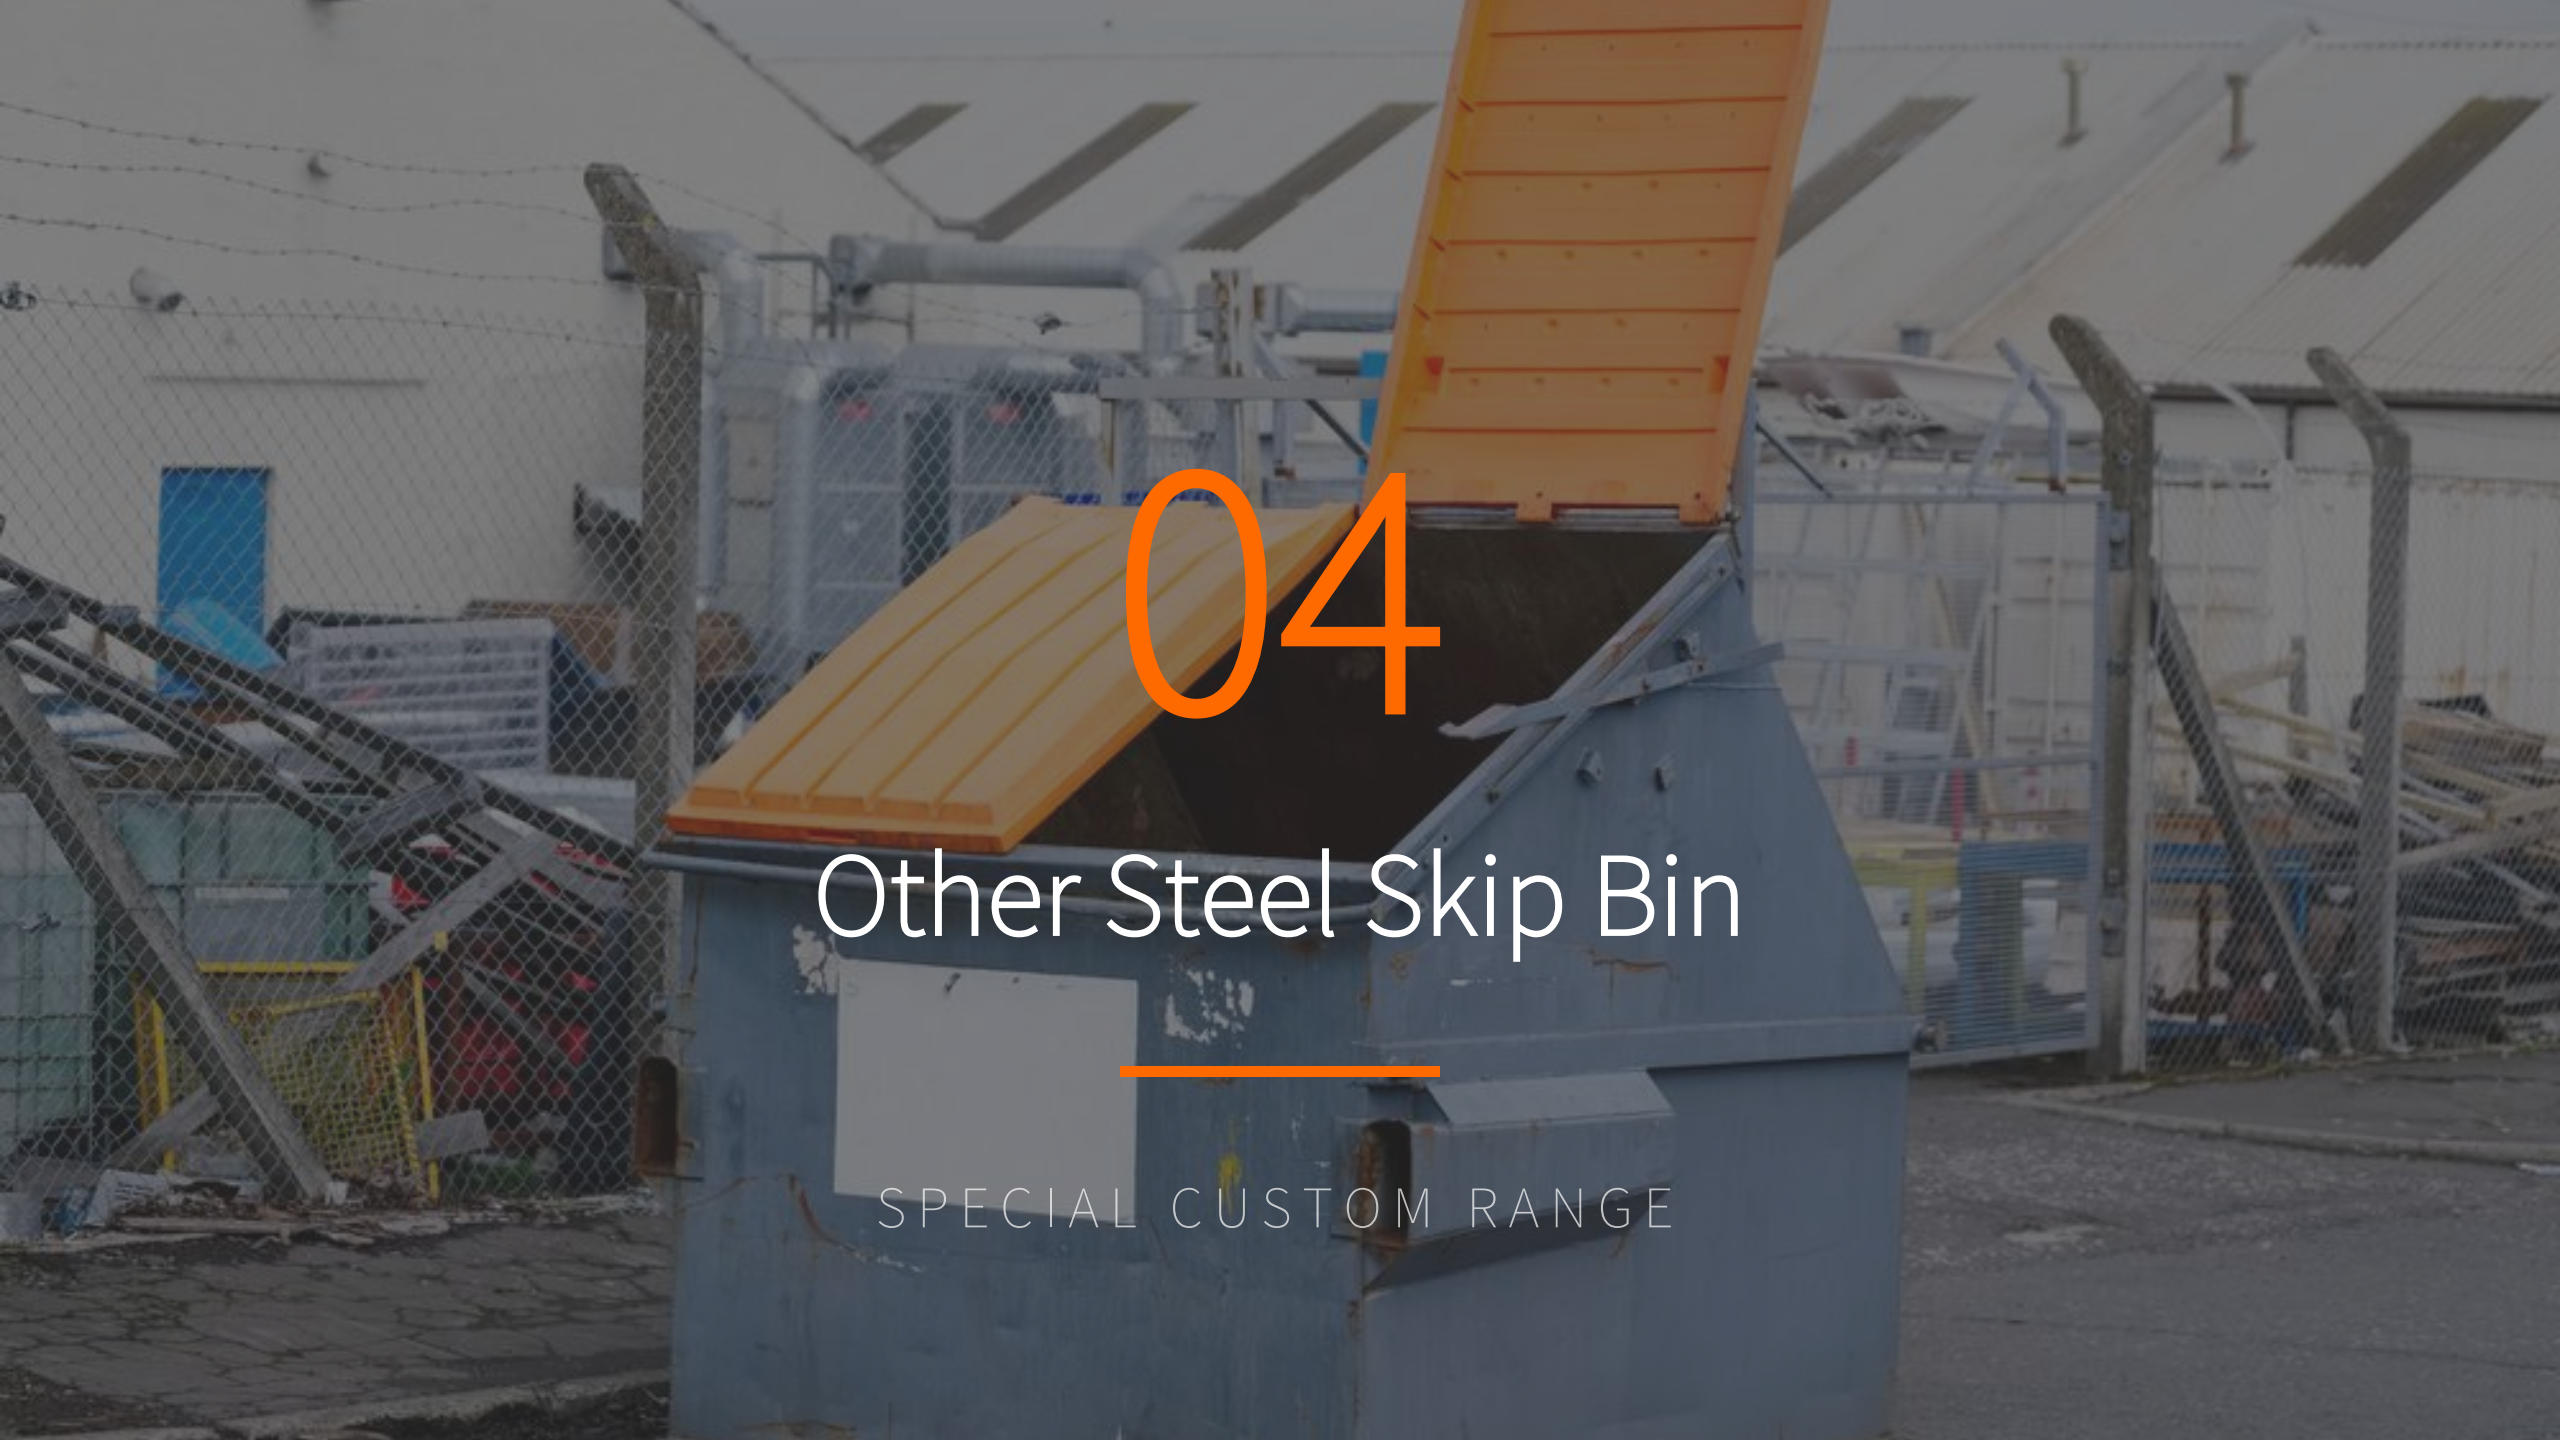

Application

Suitable for major construction projects, mining sites, large demolition works, industrial waste management and bulk material transportation.

Advantage

Maximum volume capacity for high-efficiency waste handling. Robust welded structure delivers outstanding load performance and long-term reliability under demanding conditions.

A blue steel skip bin with an orange lid is shown in an industrial setting. The bin is open, and its lid is tilted upwards. The background features a chain-link fence, a building with a corrugated metal roof, and various industrial equipment. The scene is dimly lit, suggesting an overcast day or a shaded area.

04

Other Steel Skip Bin

SPECIAL CUSTOM RANGE

Other Steel Skip Bin

01 bottom drop bin

Adapted to 1–3m³ small bins, equipped with a bottom opening discharge system for fast and efficient unloading. Ideal for material handling in factories, workshops, warehouses, and construction sites.

02 Front load bin / rear load bin

Adapted to 1.5–4.5m³ waste collection needs, designed with a front loading structure for easy lifting and emptying by front-loading garbage trucks. Ideal for commercial waste collection, municipal sanitation, factories, shopping centers, and industrial sites.

03 Self-tipping bin

Equipped with a self-tipping mechanism for quick and efficient material discharge without manual unloading. Ideal for handling construction materials, agricultural waste, scrap, and bulk materials in factories, farms, warehouses, and construction sites.

Other Steel Skip Bin

Heavy-Duty Crane Bin

Our crane bins feature reinforced lifting points and a heavy-duty steel structure for safe and efficient material handling. Ideal for construction sites, demolition projects, factories, and waste transfer applications, providing a reliable solution for lifting, transporting, and unloading bulk materials with cranes.

Forklift Bin

Heavy-duty forklift bin manufactured in our factory. Equipped with base forklift channels for convenient forklift handling, no wheels required. Multiple sizes and custom colors available for industrial waste and scrap metal collection in manufacturing plants.

Other Steel Skip Bin

01 Roll off bin with cable

Heavy-duty cable pull roll off bins with front cable hook traction slot. Fitted with solid rear sliding wheels and chain lock rear door. Multiple sizes & custom colors for construction waste haulage via cable winch trucks.

02 Hook lift mud bin

Our hook lift mud bin fits all standard hook lift trucks. Constructed from thick heavy steel, it comes with a hydraulic sealed lid and stainless drain valve to prevent slurry leakage. Fitted with safety locks and a reinforced lifting frame, it supports custom sizes and anti-corrosion coatings for sludge transportation.

03 Hooklift side open container

Our hooklift side open container fits standard hook lift trucks. Made of heavy corrugated steel with full side double doors for easy loading. Reinforced frame, wear-resistant floor and bottom rollers for smooth moving. Custom sizes, colors and anti-rust coating available for storage & waste transport.

05 / Key Advantages

01 Robust Construction

Q235/Q345 steel structural steel.
Full welding process and corner reinforcement ribs ensure no deformation or cracking when loaded.

02 High Compatibility

Adopts global standard lifting points, perfectly compatible with mainstream collection vehicles in Australia, Europe, Southeast Asia, etc.

03 Weather & Rust Resistant

Double anti-corrosion coating process (epoxy primer + polyurethane topcoat) ensures no fading or rusting outdoors for 5 years.

04 Flexible Customization

Supports various customization needs such as customized RAL colors , bin size, logo printing, thickened plates and more.

05 High Cost-Effectiveness

Factory direct sales, no middlemen, supports full-container bulk export, short delivery cycle, providing you with the most competitive price.

06 / Applications

01 Construction

House demolition, civil construction, renovations, municipal road construction.

02 Industrial Manufacturing

Metal waste, machine tool offcuts, chemical solid waste, factory waste.

03 Municipal

Tree branches, soil, greening pruning waste.

04 Commercial Rental

Bin rental companies, property management, shopping malls, hotel waste collection.

Compatible Lifting Equipment

Our Skip Bins are designed to be compatible with the world's mainstream lifting and handling equipment, ensuring your equipment investment is maximized.

Hooklift Truck

Compatible with Hooklift systems for automated and fast loading/unloading, greatly improving transfer efficiency.

Forklift Compatible

Standard slots at the bottom allow for flexible shifting and precise positioning on construction sites.

Overhead Crane System

Suitable for gantry or overhead cranes in workshops, meeting vertical lifting needs for heavy materials.

Marrel Lifting Truck

Compliant with international Marrel interface standards, widely compatible with commercial sanitation vehicles.

♦ **Design Advantage:** Standard forklift pockets are reserved at the bottom for convenient short-distance handling and positioning by forklifts.

"Internationally standardized port design for lifting equipment, achieving true multi-purpose use."

Order & Service Information

01 Minimum Order Quantity (MOQ)

1 x 20GP Full Container Load, bulk purchase enjoys a more favorable price.

02 Authoritative Certification

Products pass CE and ISO9001 certification, and a full set of export customs clearance documents can be provided.

03 Efficient Delivery

15-20 days for standard sizes, custom models completed within 35 days.

04 Warranty Service

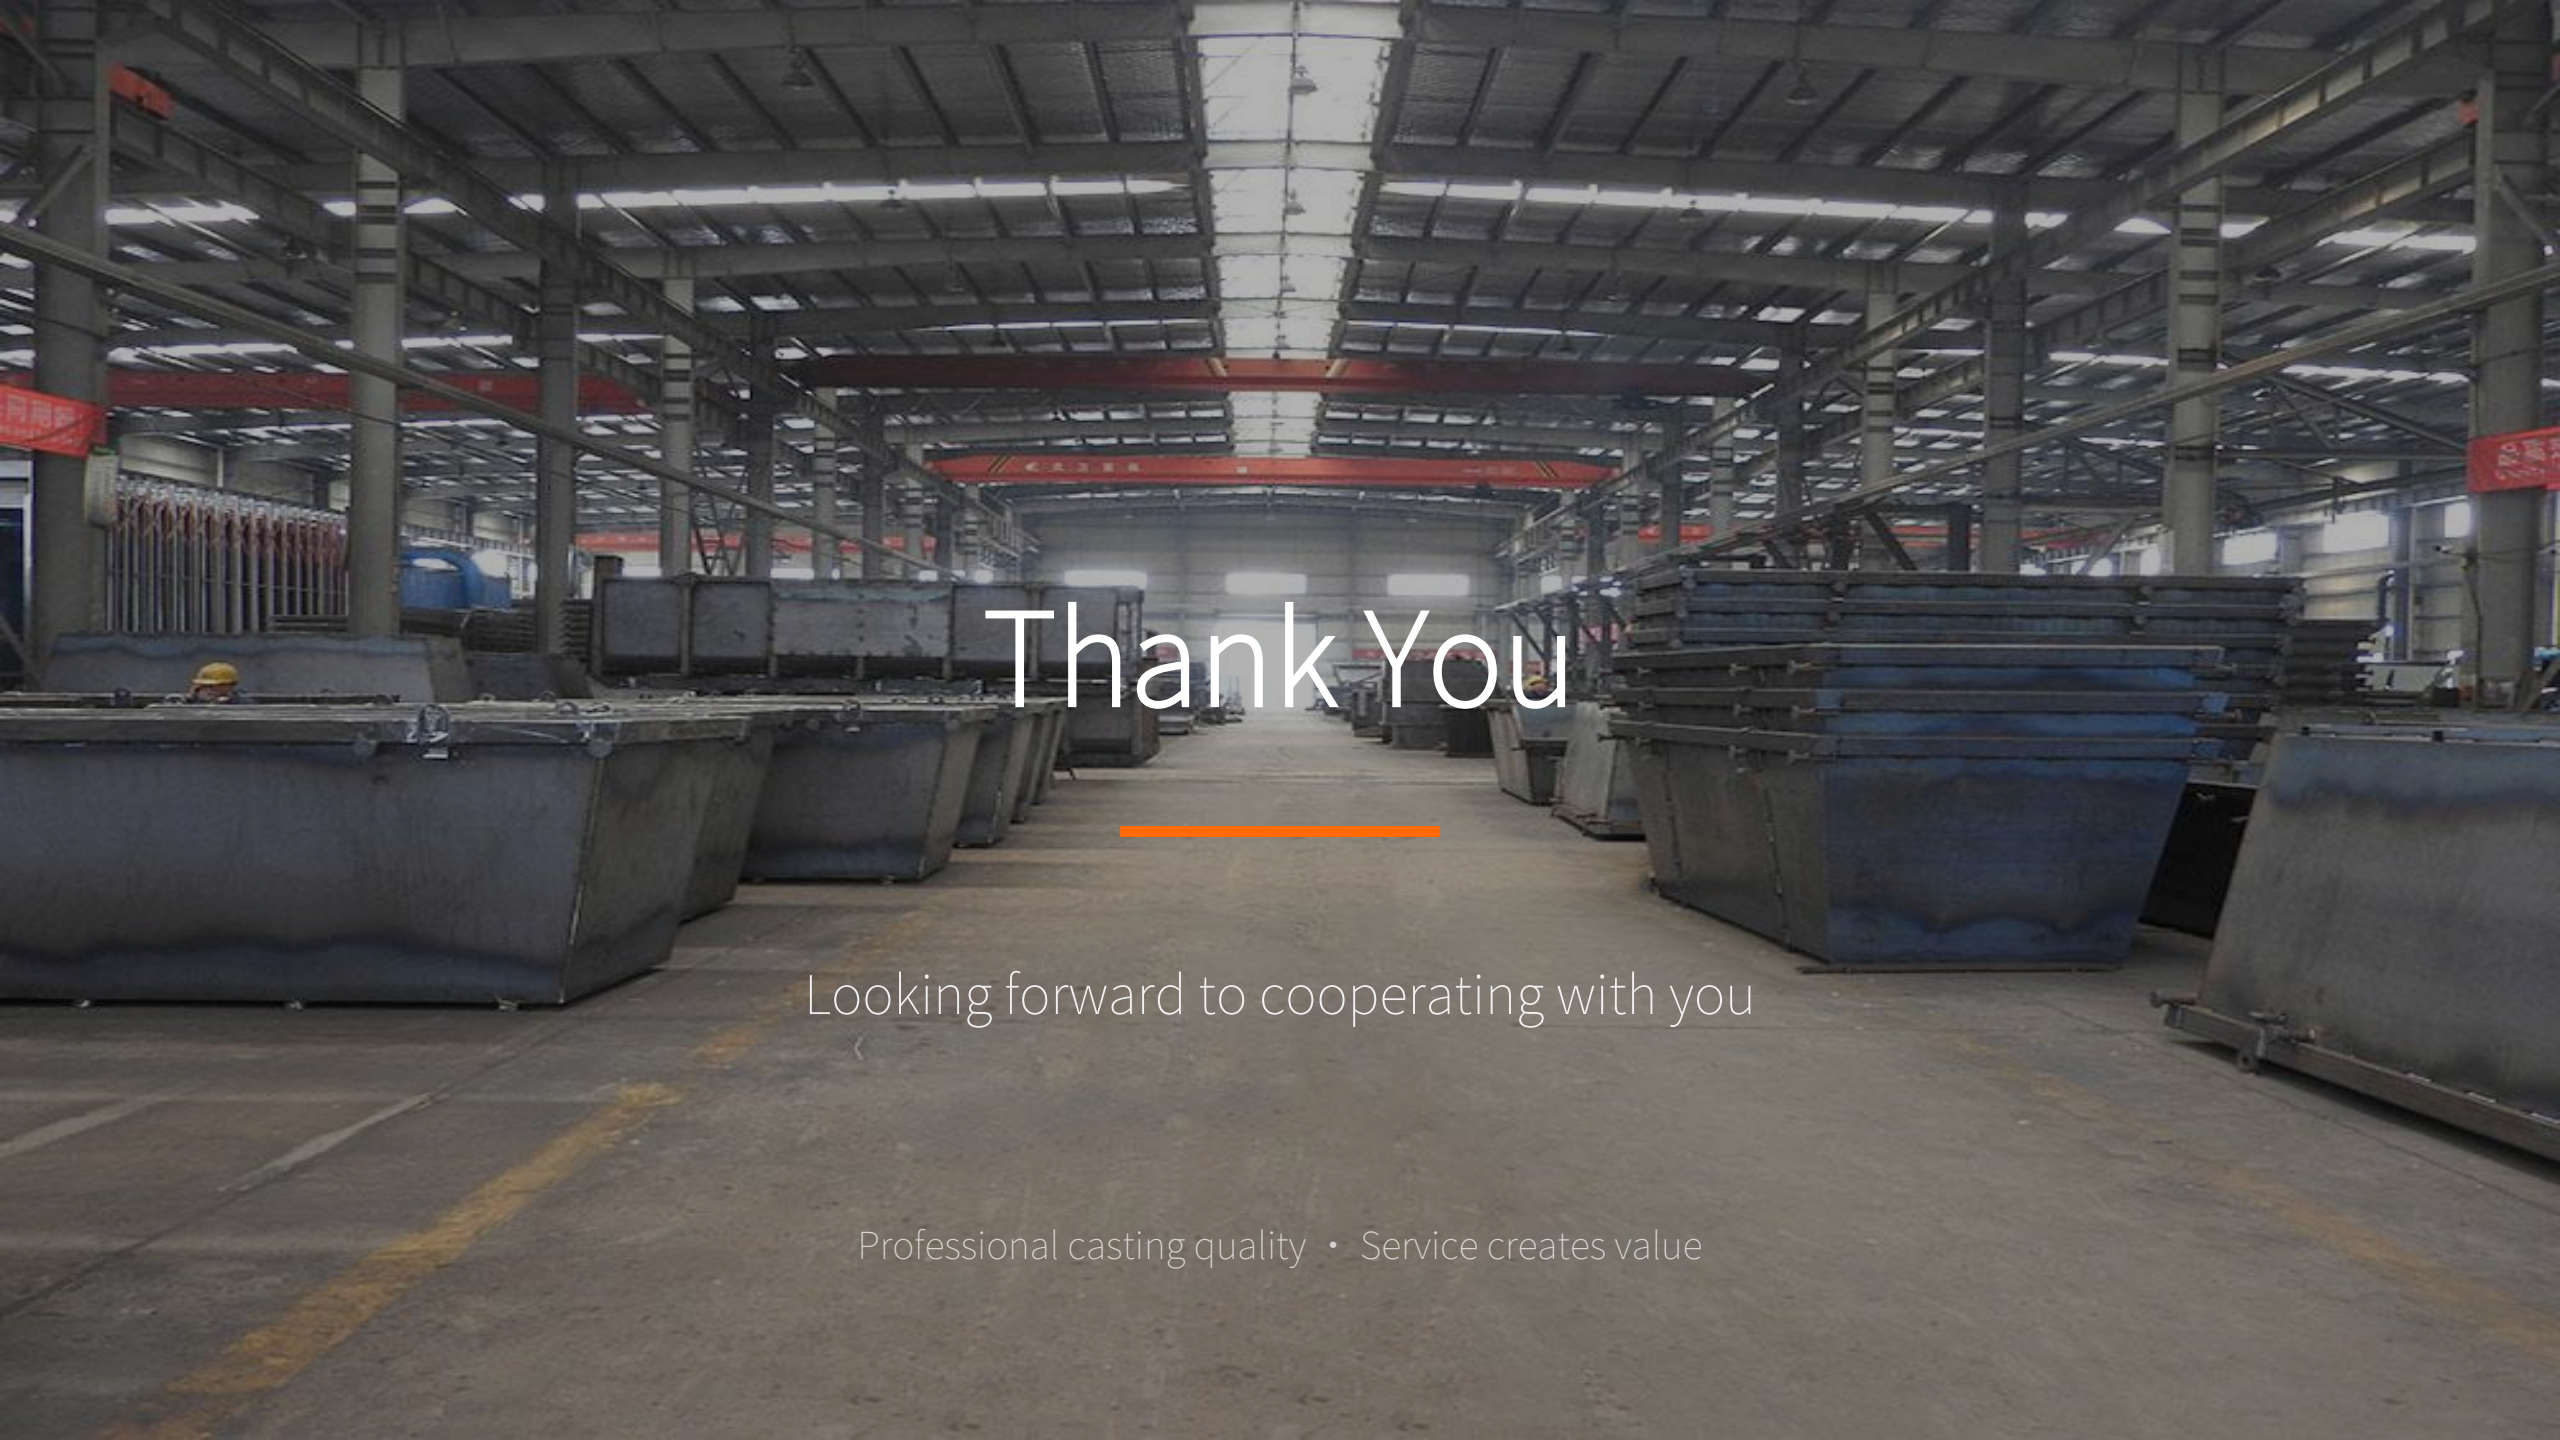

1-year warranty. In case of welding or plate quality problems during the period, we will repair or replace them free of charge.
